

**Note:**

**The hidden parts: Welding on body, realigning, broken steering cone, bended handle & fork, brake paddle, foot rest and so on has been repaired after accident. Foreman didn't take any pictures of it but it's in the repair receipts. I was also terribly injured and suffer on physically partial disablement during that time and didn't manage to take the picture.**

**Sport Rim had cracked and whole motorbike Cover set is broken including the brackets. For now I use glue to fix as temporary due to financial constraints after the accident. I manage to attach in my claims a copy of quotation from workshop for cover set & also the Rim price.**

**Thank you**
